

## TAB 6

### **Issue:**

Members of the community have asked the Board to consider live-streaming (Zoom) the regular monthly meetings.

### **Background:**

In years past, some meetings were taped for community viewing. However, the videos were sometimes altered by unknown hackers and published on Facebook in an unflattering presentation. With restrictions due to the pandemic, members of the community have once again asked that the meetings be available via Zoom or similar method. In the past, Legal has advised against video practices because of abuse by some vindictive community members.

### **Recommendation:**

To further investigate other HOA and POA organizations with experience in this arena to determine if it has been a good addition or detrimental over the long run. Contact the company that did the broadcast of the LH Candidates Forum for guidance and possible equipment purchases. If all indications are positive begin streaming Board meetings beginning in 2021. Review the process, number of participants, and determine future broadcasts.

### **Summary:**

It has been debated as to whether to begin broadcasting all Board meetings or not. A decision should be made on the proposal so that arrangements can be made should the Board decide to go forth.

### **Motion:**

I move that GM Mike contact Izner company for their professional advice and recommendations in order to broadcast LH Board of Directors meetings to LH community members starting in January 2021. Also move the Board re-evaluate the streaming process and its impact on the community in 6 months.
