

## President's Report

July 2021

Reports from Staff and Sheriff's Department were all positive regarding the 4<sup>th</sup> of July weekend. The fireworks were spectacular, the crowd was respectful, and the food trucks sold out. The Munchie Duck finally received a health permit and is open for business.

The old patrol boat broke down again over the holiday weekend. The newly purchased boat was then put into service and is now in full use for water sampling and patrolling.

The community needs to be reminded that dogs are not allowed on Beach I or II. More and more families are bringing their pets and there is concern by parents about their children swimming with dogs. Beach III is the de facto place for dogs to swim.

Master Planning had its first meeting with the Restaurant Sub-committee. Ideas and recommendations were discussed and several recommendations were made for the survey to be sent out to the community.

I am planning our first Town Hall of the year on August 28th from 10-12am at the Clubhouse. All Board members are encouraged to attend. Topics will include speeding and safety concerns by the Safety Committee, the LH financial system presented by John Martel, and Treasurer Ed Noble will report on the Bond payoff for the dam sanitary district. The Nominating Committee will explain the new online voting system and the proposal to change from eleven to a nine-member Board of Directors. The Lake Committee will talk about the new dock system and fish habitats. The Restaurant Committee will present their proposal for an inhouse restaurant. The Tech Committee and John Stove will make the meeting available to the community through our new audio/visual equipment. This would be the first time to include the entire community in a meeting via streaming. I encourage the community to tune in or attend the meeting and learn the facts on all these topics from members directly involved in the subject matter.

GM Mike Goodwin has hired an office temp to help with paperwork involving LH traffic violations. The procedure to send registered letters to violators is becoming a full-time job. Violations have been as high as 300 a month but even

though violations have slowed to 100 a month, it has put an undue burden on Staff and the Compliance Committee. Discuss.

Weekly lake water testing has indicated low e-coli readings. While the lake continues to be safe for use, e-coli amounts do increase after storm events.

The Tech Committee is working to update LH resident's email addresses and any issues that limit their access to our web site. Before the Town Hall on Aug. 28<sup>th</sup>, a community-wide broadcast trial will be attempted August 10th to work out any bugs in the system. The Committee will have people available to update computer systems, lap tops, tablets, and iPhones for those who have a problem receiving Lake Holiday electronic mail.
